Education

University of British Columbia *Vancouver, BC*
BSc. Computer Science · 3.9/ 4.0 GPA · Dean's List

Experience

Chief Operating Officer **September 2025 – Present**
Omnipresent *Remote*

- Scaled marketing and growth operations by leading a cross-functional **team of 19** [content (5), design (10), partnerships (3), and advising (2)] to execute GTM and TGE launches valued at **$100M–$700M+.**
- Generated **100M+ impressions** across KOL campaigns by managing **six-figure budgets** and optimizing creator selection, audience targeting, and content strategy based on real-time performance data.
- **Reduced CPM by 24%** by establishing KPI frameworks and performance benchmarks, enabling data-driven budget reallocation across clients valued at **$100M–$1B+.**
- **Improved delivery by 35%** by managing Gantt timelines, implementing standardized processes, and delivering consistent stakeholder reports across concurrent client engagements.
- Led development of a custom **AI-powered integration** between Notion and Telegram that **reduced task turnaround by 30%** and improved **KPI attainment by 22%** across clients.

Technical Product Owner **May 2024 – Feb 2026**
Animoca Brands (Acquired SFT Studios) *Remote*

- Drove user growth and retention across the Animoca Brands ecosystem by leading integrations and initiatives across **10+ sister organizations** which lead to increase in user **by 24%.**

Technical Product Owner and Engineer **May 2024 – Feb 2026**
SFT Studios *Vancouver, BC*

- Owned product strategy and operations across 3 products: **gaming application, e-commerce, and anime loyalty platform** leading a team of **6 engineers and 2 designers**.
- Defined roadmap and led product and engineering for loyalty platform, scaling from **0 to 130K users**.
- Built and deployed smart contracts in Solidity, while bridging technical and non-technical teams by communicating Web3 concepts in accessible terms to drive product alignment.
- Led end-to-end product feature delivery through strategic partnerships with **Young Magazine, Kodansha**, and Anime NYC, driving launches that attracted over **100K users**.
- Developed a custom AI-powered analytics tool that transformed website data into actionable PRDs and growth plans, driving a **30% increase in site retention and 20% boost in traffic**.

Software Engineer **January – April 2024**
Splunk *San Francisco, CA*

- Identified and defined a Saved Searches feature for the Enterprise Dashboard, reducing user workflow steps by **35%** and improving usability across **1,000+ enterprise clients**.
- Led cross-functional coordination across **three teams** and multiple repositories to ship new dashboard features, driving alignment on requirements, scope, and delivery timelines.
- Optimized dashboard performance by refactoring key components, resulting in a **20% improvement** in load times for enterprise clients, positively impacting user engagement.

Software Engineer **May – December 2023**
KLKTN *Vancouver, BC*

- Contributed to the full software development lifecycle of multiple **React.js/ Next.js, Nest.js** web applications.
- Owned and shipped key product features across applications, scaling the product from **0 to 15K users**.

Software Developer at STN Video **September 2022 – April 2023**
Web Application Developer at Goopter eCommerce Solutions **May – August 2022**

Projects

DuoASL · 1st place for Healthcare & Accessibility **Hackathon Project**
Next.js, React.js, TypeScript, Auth0, Flask, Python, TensorFlow, Tailwind

- Gamified learning app that teaches ASL powered by our LSTM Deep Learning Model with 90% accuracy.
